

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY
(Chapter II of the Patent Cooperation Treaty)

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference 51154 WO		FOR FURTHER ACTION See Form PCT/IPEA/416																	
International application No. PCT/IB2002/004162	International filing date (day/month/year) 10.10.2002	Priority date (day/month/year) --																	
International Patent Classification (IPC) or national classification and IPC H04R 1/28 // G10K 11/02																			
Applicant Nokia Corporation et al																			
<p>1. This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36.</p> <p>2. This REPORT consists of a total of <u>5</u> sheets, including this cover sheet.</p> <p>3. This report is also accompanied by ANNEXES, comprising:</p> <p>a. <input checked="" type="checkbox"/> (sent to the applicant and to the International Bureau) a total of <u>3</u> sheets, as follows:</p> <p><input checked="" type="checkbox"/> sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).</p> <p><input type="checkbox"/> sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.</p> <p>b. <input type="checkbox"/> (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) _____, containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).</p> <p>4. This report contains indications relating to the following items:</p> <table border="0"><tr><td><input checked="" type="checkbox"/> Box No. I</td><td>Basis of the report</td></tr><tr><td><input type="checkbox"/> Box No. II</td><td>Priority</td></tr><tr><td><input checked="" type="checkbox"/> Box No. III</td><td>Non-establishment of opinion with regard to novelty, inventive step and industrial applicability</td></tr><tr><td><input type="checkbox"/> Box No. IV</td><td>Lack of unity of invention</td></tr><tr><td><input type="checkbox"/> Box No. V</td><td>Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement</td></tr><tr><td><input type="checkbox"/> Box No. VI</td><td>Certain documents cited</td></tr><tr><td><input type="checkbox"/> Box No. VII</td><td>Certain defects in the international application</td></tr><tr><td><input checked="" type="checkbox"/> Box No. VIII</td><td>Certain observations on the international application</td></tr></table>				<input checked="" type="checkbox"/> Box No. I	Basis of the report	<input type="checkbox"/> Box No. II	Priority	<input checked="" type="checkbox"/> Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	<input type="checkbox"/> Box No. IV	Lack of unity of invention	<input type="checkbox"/> Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement	<input type="checkbox"/> Box No. VI	Certain documents cited	<input type="checkbox"/> Box No. VII	Certain defects in the international application	<input checked="" type="checkbox"/> Box No. VIII	Certain observations on the international application
<input checked="" type="checkbox"/> Box No. I	Basis of the report

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International Application No.

PCT/IB2002/004162

Box No. I Basis of the report

1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.

- ☐ This report is based on a translation from the original language into the following language _____, which is the language of a translation furnished for the purposes of:
- ☐ international search (under Rules 12.3 and 23.1(b))
 - ☐ publication of the international application (under Rule 12.4)
 - ☐ international preliminary examination (under Rules 55.2 and/or 55.3)

2. With regard to the elements of the international application, this report is based on (*replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report*):

- ☐ the international application as originally filed/furnished
- ☒ the description:
- pages 1-19 _____ as originally filed/furnished
- pages* _____ received by this Authority on _____
- pages* _____ received by this Authority on _____
- ☒ the claims:
- pages _____ as originally filed/furnished
- pages* 1-3 _____ as amended (together with any statement) under Article 19
- pages* _____ received by this Authority on _____
- pages* _____ received by this Authority on _____
- ☒ the drawings:
- pages 1-5 _____ as originally filed/furnished
- pages* _____ received by this Authority on _____
- pages* _____ received by this Authority on _____
- ☐ a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.

3. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/figs _____
- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to the sequence listing (*specify*): _____

4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/figs _____
- ☐ the sequence listing (*specify*): _____
- ☐ any table(s) related to the sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International Application No.

PCT/IB2002/004162

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 1 - 13

because:

☐ the said international application, or the said claims Nos. _____
relate to the following subject matter which does not require an international preliminary examination (*specify*):

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. _____
are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. _____ are so inadequately supported
by the description that no meaningful opinion could be formed.

☒ no international search report has been established for said claims Nos. 1 - 13

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the
Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with
the technical requirements provided for in the Annex C-bis of the Administrative Instructions.

☒ See Supplemental Box for further details.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International Application No.

PCT/IB2002/004162

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of: BOX III

All of the claims 1-13 (claims 6-11 as referring to any of claims 1-5) comprise design features which were not present in the claims 1-9 that were subject to the search report. As said added design features has not been the subject of a search, no opinion with regard to novelty, inventive step and industrial applicability will be established with regard to claim(s) comprising such a design feature.

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Neither of claims 2-11 is drafted in accordance with PCT Rule 6.3(b)(ii), since the word "wherein" does not unambiguously define the characterising part of a claim but may as well, as, e.g., in the present claims 1, 12 and 13, be used to further limit or specify the preamble of a claim. Thus, the phrase "wherein" does, per se, i.e., if not followed by the phrase "the improvement comprises" or similar, not define the characterising portion of a claim. In the present case, no obvious reason for not considering it "appropriate" to use any of the examples mentioned in PCT Rule 6.3(b)(ii) for defining the characterising portion of each of claims 2-11 can be seen.

PCT-Application WO PCT/IB02/04162

Applicant / Owner: Nokia Corporation

Title: Sound generating apparatus having enhanced frequency...

Our Ref.: 51154 WO (KG/TP)

Amended Claims

1. Sound generating apparatus comprising:

- 5 - a first cavity (110);
- a second cavity (120); and
- an electro-mechanical transducer (100),
 said electro-mechanical transducer (100) exciting sound waves in said first cavity (110)
 and said second cavity (120);
- 10 - a third cavity (130), wherein said third cavity (130) is connected to said first cavity (110)
 via at least one first passage (115) of predefined shape, and said third cavity (130) is
 connected to said second cavity (120) via at least one second passage (125) of predefined
 shape,
 said third cavity (130) having one or more outlets (150) allowing to radiate sound waves
- 15 (160) into the exterior;
 wherein said sound generating apparatus provides for acoustical amplification in a
 frequency range;
 characterized in that said sound generating apparatus also provides for acoustical
 amplification in a high frequency range; wherein said high frequency range amplification is
- 20 in a frequency range between 850 Hz and 7 kHz.

2. Apparatus according to claim 1, wherein said high frequency range amplification serves for
acoustical amplification in a frequency range between 950 Hz and 7 kHz.

25 3. Apparatus according to claim 2, wherein said high frequency range amplification serves for
acoustical amplification in a frequency range between 2 kHz and 7 kHz.

4. Apparatus according to any one of the preceding claims, wherein said high frequency range
includes at least one acoustic resonance, which serves for acoustic amplification.

30 5. Apparatus according to any one of the preceding claims, wherein said sound generating
apparatus is adapted to a perceptible frequency range of human organs of hearing, which
ranges approximately from 20 Hz to 18 kHz.

6. Apparatus according to any one of the preceding claims, wherein said electro-mechanical transducer (100) has a main direction (185) for emitting sound and a supplementary direction (190) for emitting sound, wherein sound waves emitted along said main direction (185) are radiated into said first cavity (110) and sound waves emitted along said supplementary direction (190) are radiated into said second cavity (120).
7. Apparatus according to any one of the preceding claims, wherein said first cavity (110) has a first volume and said second cavity (120) has an essentially bigger second volume.
8. Apparatus according to any one of the preceding claims, wherein said first cavity (110) and said third cavity (130) have substantially an approximately same volume.
9. Apparatus according to any one of the preceding claims, wherein said first cavity (110) and said second cavity (120) are arranged adjacent to each other, wherein said first cavity (110) and said second cavity (120) are spatially separated from each other by said electro-mechanical transducer (100).
10. Apparatus according to any one of the preceding claims, wherein said electro-mechanical transducer (100) is a loudspeaker.
11. Apparatus according to any one of the preceding claims, wherein said apparatus is suitable for being implemented in a portable electric device (200).
12. Mobile electric device comprising a sound generating apparatus comprising:

 - a first cavity (110);
 - a second cavity (120); and
 - an electro-mechanical transducer (100),

said electro-mechanical transducer (100) exciting sound waves in said first cavity (110) and said second cavity (120);

 - a third cavity (130), wherein said third cavity (130) is connected to said first cavity (110) via at least one first passage (115) of predefined shape, and said third cavity (130) is connected to said second cavity (120) via at least one second passage (125) of predefined shape,

said third cavity (130) having one or more outlets (150) allowing to radiate sound waves (160) into the exterior;

wherein said sound generating apparatus provides for acoustical amplification in a low frequency range;

characterized in that said sound generating apparatus also provides for acoustical amplification in a high frequency range; wherein said high frequency range amplification is located in a frequency range between 850 Hz and 7 kHz.

5 13. System for generating sound comprising:

- a first cavity (110);
- a second cavity (120); and
- an electro-mechanical transducer (100),
said electro-mechanical transducer (100) exciting sound waves in said first cavity (110)
10 and said second cavity (120);
- a third cavity (130), wherein said third cavity (130) is connected to said first cavity (110)
via at least one first passage (115) of predefined shape, and said third cavity (130) is
connected to said second cavity (120) via at least one second passage (125) of predefined
shape,
15 said third cavity (130) having one or more outlets (150) allowing to radiate sound waves
(160) into the exterior;

wherein said sound generating apparatus provides for acoustical amplification in a low frequency range;

20 characterized in that said sound generating apparatus provides also for acoustical amplification in a high frequency range; wherein said high frequency range amplification is located in a frequency range between 850 Hz and 7 kHz.
